Who has influence over what

	National Government	Local Government	Local people
Energy used in travel	• Allocates money to local authorities to spend on roads, cycling, walking etc. • Trains	• HCC is the transport authority so controls roads, buses and sets the overall framework in the Local Transport Plan. • WCC has some powers: car parking, walking & cycling routes.	• Lobby MPs and Government to allocate funding to low-emissions "active" transport e.g. pavements, cycle routs. • Support HCC and WCC to make transport, climate-friendly. e.g. Local Transport Plan 4, consultation on Active Travel road changes. • Reduce household car use e.g. car clubs, car share, more cycling and walking. • Shift to smaller cars • Shift to electric cars and bicycles.
Energy used in the home – new housing	• NPPF (National Planning Policy Framework) that controls what Councils can require of house-builders	• WCC cannot require developers to do things (like solar panels) unless the Local Plan says so. Local Plan consultation period open until 21st April, please input.	• Lobby MPs and Government to change NPPF to make it possible for local authorities to set minimum standards for developments. • Support WCC to make Local Plan climate-friendly to control what developers do. Local Plan consultation period open until 21st April, please input.
Energy used in the home - retrofitting	• Can allocate money to train tradespeople. • Can create grants like Green Homes Grant, Renewable heat Incentive.	• WCC can and is continuing to retrofit social housing	• Lobby MPs and Government to fund training and retrofit grants • Lobby WCC to retrofit social housing • Encourage and support home-owners to retrofit
More renewable energy	• Sets framework for what can be decided locally; can over-rule local preferences	• WCC approves or rejects planning applications for renewable energy e.g. solar farms, wind turbines. • HCC can help schools invest in solar panels	• Encourage and support home-owners to install solar panels • Support planning application for renewable energy • Set up community-owned renewable generation e.g. solar panels on roof of hall or church

DRAFT

Low carbon food	• Makes laws about food pricing, display, tax etc	• May have some influence over farmers, local markets • Planning permission for fast-food outlets • Can give permission for food growing on land, create allotments	• Lobby supermarkets • Community food growing • Community food purchase • Community composting • Individual diet choices e.g. less meat and milk • Individuals reduce food waste
Investments	• Foreign aid – shouldn't be spent on fossil fuel projects, or anything bad for the climate	• Have investments in fossil fuels – especially Hampshire Pension Fund (which is used by WCC and other local public bodies)	• Lobby HCC to take all investment out of fossil fuel (WCC has already done so. • Lobby HCC and WCC to invest money in "green" projects e.g. renewable energy. • Join campaign for Hampshire Pension Fund to do the same. • Shift your own investments to green projects – and press your private pension to divest and invest.
Consuming less	• Set tax system	• Can target business incentives.	• Tool "libraries" e.g. share lawnmowers, electric tools • Freecycle, swapshops, car boot sales, charity shopping • Buy less stuff • Repair and mend
Waste and recycling	• Sets framework and targets	• WCC collects waste and recycling • HCC disposes of it	• Compost green and food waste – individually or in community schemes. • Avoid buying things with packaging; avoid packaging that can't be recycled • Lobby WCC to collect food waste • Lobby HCC to replace incineration
