How I created South Wonston Sustainability's Website

By Lillie Holmes

lillie@robholmes.net

Who am I?

I am Lillie, I live in South Wonston, I’m a original member of South Wonston Sustainability which has been running for two years.

I started being the run around for blister packs and then wanted to get a head start on sustainable living as I can see the pressure Im going to have from my daughter.

I have no experience of websites, I was just frustrated of everyone saying we needed a website so I googled. How do I create a website.

Why GoDaddy?

When I started looking I only had 3 requirements:

Something I could use easily.

Something not too expensive.

Something where the domain and website were separate.

I did also look at reviews and trust pilot.

Go Daddy looked like it would work for us. After a hour I had a website.

Price

Cheaper to pay annually

Fantastic discounts to get you in.

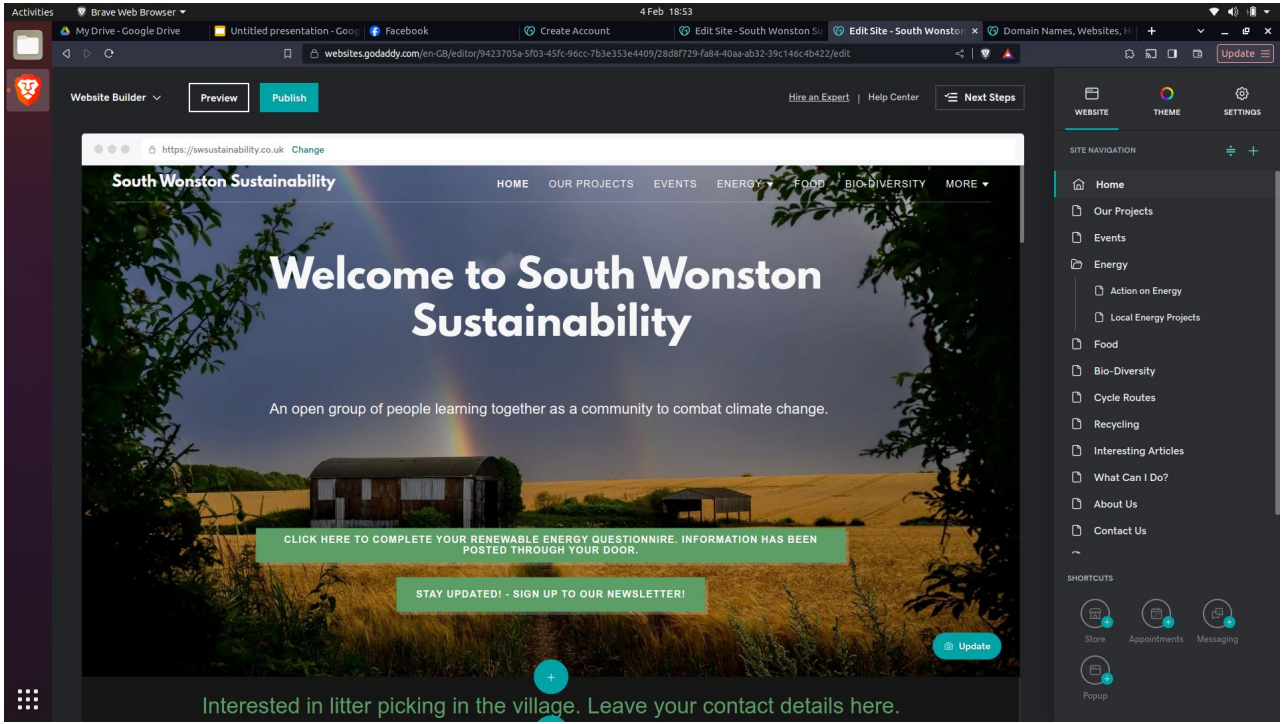

Im renewing now and will pay £119.98 (£10 a month)

4500 visits in the first year.

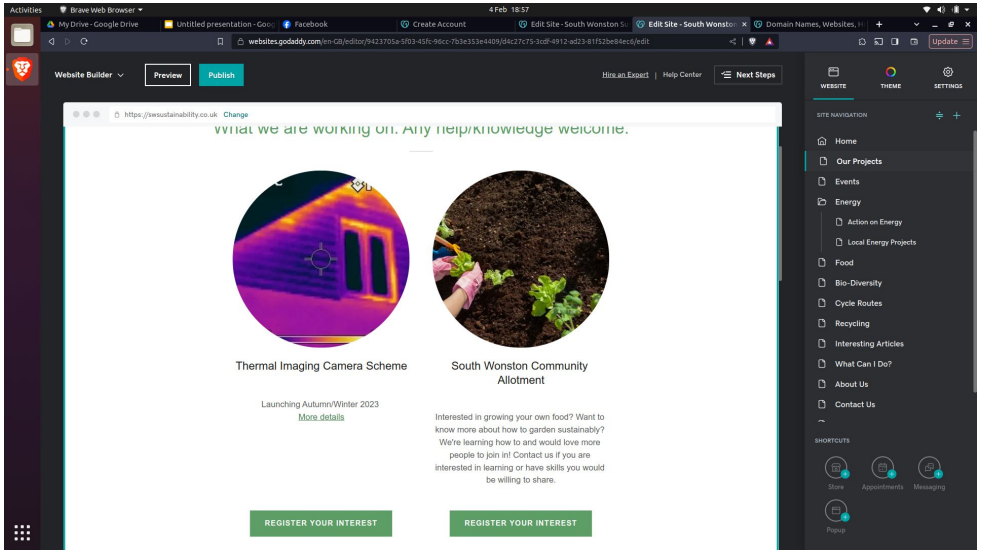

We use it as a great way to get people to connect with the right areas. Ie thermal imaging goes direct, litter picking straight to parish clerk.

So lets get started

CLIMATE HUB
2-4pm
Everyone welcome to come to the pavilion to see what we have done so far, what we are working on now and see our future plans.
We are in need of more people to help to make repair cafes, community energy project and swap and sell events successful. Come and have a cuppa and say hello.

The website started with a homepage explaining who we were with pictures from a facebook request.

Each of our action groups - food, biodiversity, energy, travel and circular economy gave me a summary of what they are doing to introduce themselves.

There was a contact us page.

Also a page with our events.

Over the past year pages have been added with content from events.

I update the website seasonally and add content from the rest of the team when needed.
